

GBST

SuperStream

Your automated and compliant SuperStream connectivity

Messaging hub for SuperStream connectivity and compliance, enabling superannuation funds to achieve complete straight through processing and improve member experience.

Our SuperStream Gateway is certified and compliant with Australian Tax Office (ATO) standards to provide all the functionality required for SuperStream participants.

It leverages our extensive network of messaging capabilities and is built on modern technology, processing over 150,000 transactions per month. Our service is fully hosted and managed to ensure a high degree of availability and quality messaging management.

While SuperStream participation is mandated for superannuation funds, there are opportunities for competitive advantage beyond compliance.

Integrating your gateway with your registry capability and digital user experience can deliver true straight through processing of superannuation data and funds.

GBST SuperStream is fully compliant with all aspects of the Federal Government's Stronger Super legislative reforms. GBST is a signatory to the Memorandum of Understanding (MoU) that governs the operation of the Gateway Network Governance Board (GNGB). GBST are on the GNGB technical workgroup, and are an accredited SuperStream Gateway Operator in Australia.

Features

Boost operational efficiency

Automate your SuperStream participation with exception-based workflows, reducing manual intervention and risk of errors in your back office.

Safeguard your compliance

Meet ATO compliance standards now and in the future, with all regulation changes included in your licence fee and proactively managed by our expert team.

Improve member experience

Engage and impress your members with quick and seamless onboarding and rollovers powered by our reliable and secure gateway.

Secure and scalable solution

SuperStream Gateway

With SuperStream, you'll benefit from:

Supports all functions

Supports trading partner management, non-repudiation, secured signing, encryption and guaranteed delivery.

Fully audited

All messages are sent, received and stored for auditing purposes according to ATO standards.

Hosted and managed

Delivers high availability with regular upgrades and performance monitoring.

Admin console

- ✓ Complies with the AS4 Profile of the ebMS 3.0 specification
- ✓ Supports trading partner management, non-repudiation, secured signing, encryption and guaranteed delivery
- ✓ Supports large messaging handling, splitting and joining

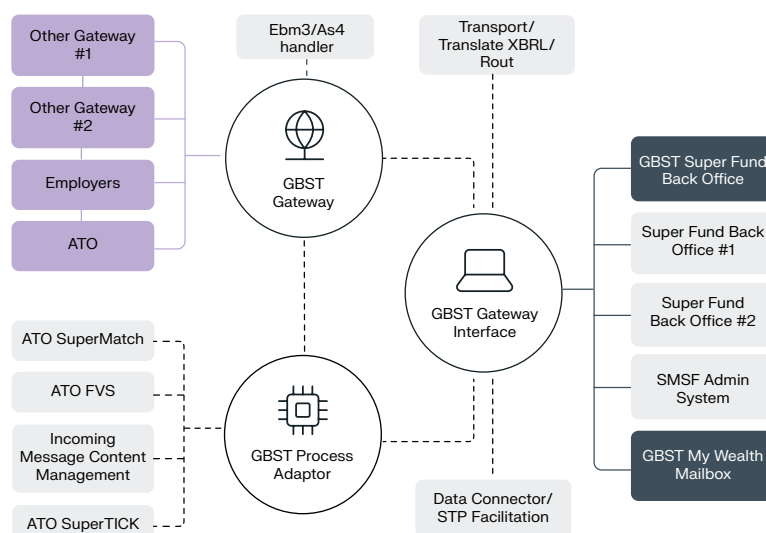

Powerful straight through processing

Plugging our SuperStream Gateway into our Composer platform will increase efficiency in your back office. It removes the need for manual intervention and risks of inaccurate data flowing into your systems.

Integrated SuperStream Gateway can also improve the experience for members signing up or rolling over money to your fund. Build it into your website or member portal to create a seamless and quick user experience and remove the need for paper and wet signatures – the type of experience today's consumers expect.

Our digital team, experts in customer experience and user experience design, can support with a modern and engaging interface.

Complete SuperStream solution

About GBST

GBST delivers technology and digital solutions to enable, support, and scale wealth management and advice organisations globally. Our team of experienced professionals create vital back, middle, and front-office solutions for wealth managers, life and pension companies, stockbrokers, fund managers, advisers, and investment managers, as well as offer financial tools and digital services to banks and loan providers. Founded in 1983, GBST works with more than 100 financial brands across Europe, Australia, New Zealand, the US, Canada, and the UAE. Our leading-edge technology supports over 5.5 million investor accounts under administration with Direct to Consumer, Advised and Workplace channel solutions.
